## EXPLODED VIEW

### To Service the Prelude MTS Tower:

- 1) Lay the loudspeaker down on a padded, level surface with the drivers facing upwards. Enclosure will have a tendency to "roll" so it must be propped; then remove the grille.
- 2) Extract all (12) rubber grille retainers; this can be accomplished by carefully pulling them out of their cavities with long-nosed pliers or similar tool.
- 3) Remove the (12) Philips screws that are now exposed.
- 4) Carefully lift the fully loaded baffle off the cabinet.
